Note:

This program is structured to provide a complete learning journey from understanding the fundamentals of Stellar blockchain to applying it through hands-on development. Participants will be guided step-by-step in setting up their environment, exploring smart contract development using Soroban, and integrating their solutions into functional applications.

During the development session, participants are encouraged to build their own unique project ideas, ensuring each output is distinct and showcases their individual understanding of the technology. Mentors will be available throughout to assist with technical challenges, validate progress, and provide best practices.
